DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 3, and 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 2 and 7, the location of the inner sphere is not clear. Claims 3 and 9 – if the sine waves define the outer sphere the apices would inherently located on the outer sphere.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Nesbitt et al (5,044,638). Nesbitt discloses a golf ball with a sinusoidal surface (abstract). The golf ball further includes first and second hemispheres connected at a parting line. The diameter is an inherent feature since Nesbitt's invention is a golf ball according to USGA standards, which requires all golf balls to be at least 1.68 inches. With respect to claim 7, the inner sphere is not clear, see above.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nesbitt. Nesbitt discloses a sinusoidal pattern on the surface of the golf ball and further discloses identical sinusoidal lines along the surface. Overlapping and varying the sinusoidal pattern is a modification within the capabilities of one skilled in the art that would enhance the aerodynamic properties of the golf ball.

Claims 1, 3, 4, 6, 7, 9, 10, and 12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Taylor (1,286,834). Regarding claims 1, 3, 7, and 9, Taylor discloses a golf ball comprising a pattern on the surface that appears to be identical to the sinusoidal surface claimed by applicant (see fig 5). The diameter is an inherent feature since Taylor's invention is a golf ball according to USGA standards, which requires all golf balls to be at least 1.68 inches. Regarding claims 4 and 10, figure 5 appears to show an apex width within applicant's range. Regarding claims 6 and 12, since the pattern is three-dimensional the helical sinusoidal is included.

Double Patenting

Art Unit: 3711

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3, 5, and 6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 5-8 of U.S. Patent No. 6,632,150. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application and the '150 patent claim identical subject matter. Rearranging the limitations among the claims does not render a patentable distinction.

Allowable Subject Matter

Claims 8 and 11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
